

Ink Pumps

The Yamada InkPRO® Ink Pump was developed exclusively for the transfer of High Viscosity printing inks and are designed to address the issues which have historically plagued ink pumping systems. With a field tested and Innovative design coupled together with stringent quality standards, the Yamada InkPro® has highly competitive performance and operation reliability under continuous (24/7) operation. This helps eliminate costly printing press shutdowns, excessive ink wastage unnecessary noise mess and maintenance costs.

Yamada has been dealing with the Ink and Printing industries for more than 3 decades. Yamada's product list includes a comprehensive range of Air Operated Double Diaphragm Pumps as well as the InkPRO® Range of Inline Piston, Ink Supply Pumps.
